EXPERIENCE

Tech4Teens — Owner

Jan 2022 - PRESENT

T4T is a business that teaches kids how to program in Python using a project-based learning methodology. The curriculum was created by me and is designed to help kids learn programming in a fun and engaging way.

Hagans Plastics, Grand Prairie — STEM Intern

Sep 2018 - June 2019

I worked on embedded systems for PVC cutting machines and monitored automation and quality assurance teams.

PROJECTS

Portfolio Website

My portfolio website that I used React.js, SCSS, and Typescript to make.

Bug Tracker

Developed a full-stack application called Bug Tracker that enables organizations to manage their projects. The application includes features such as a real-time dashboard and member assignments for issues/tasks

Messaging App

Developed a full-stack mobile application for iOS and Android that enables users to connect with each other in real-time through messaging

Skills

Python, Java, Javascript/Typescript, React/React Native, HTML/CSS, Tailwind, Node.js, Express, SCSS, Neovim.
